10 Things Teachers Can Do

To Help Under-Resourced Children Learn

- 1 Mediate, mediate, mediate (Explain not only WHAT they need to do, but also WHY and HOW to do it).
- 2 Build a relationship of mutual respect with each student.
- 3 Communicate to parents the need to talk to their children.
- 4 Connect lessons to students' lives and interests.
- 5 Help students reflect on the future.
- 6 Explain that we were not born with a set amount of intelligence. Our brains grow every time we use them.
- 7 Make students aware of their own, personal growth. Point out to them what they can do now that they couldn't do a week (month, etc.) ago.
- 8 Focus frequently on the beauty and power of words.
- 9 As often as possible, give students choices.
- 10 Teach processes.
