- BoNita Harris
- Sharita Giles

Organizing Adults

Mississippi Department of Education Office of School Improvement engages leadership and leadership coaches to work with high schools in redesign.

Students at the Center

All comprehensive school supports focus on student outcomes to ensure all students have the experiences and opportunities to be successful in life.

Teaching & Learning

Guidance is provided for professional learning communities, leadership teams and school wide professional learning to promote common language and a shared vision for educational experiences in all classrooms.

Postsecondary Pathways

Schools are supported in their efforts to provide a variety of pathways to ensure each student graduates from high school college and career ready.

CSI COHORT AVERAGE GRADUATION RATES

2020-21	80.58%
2018-19	65.94%

Being part of the thinking as a learner and leader with colleagues in our state and across the nation has been a tremendously beneficial experience as we reimagine supports for students, schools, districts, and communities.

Dr. Sonja Robertson

"Engaging in the high school redesign experience has provided an opportunity for CSI high schools to rethink the way they have school. They have had an opportunity to be innovative in their approach by providing students with experiences that will prepare them for college and beyond."

**Dr. LeKeisha Sutton,
Leadership Coach**

One idea that turned out better than we expected

Our Mississippi High Schools have fully engaged in cross state events across the network and in Mississippi High School Redesign Virtual Convenings this year.
